LUKE W. SYDOW

LANDSCAPE ARCHITECT

Luke has extensive experience working as a Landscape Architect in both Colorado and Minnesota. His expertise in all aspects of site planning, park design, grading and landscape design makes him particularly well suited for Landscape Architecture services. He has managed a wide range of commercial facilities to park designs, both public and private.

Raised in Duluth, Luke has the background and knowledge needed to work in the Northland. Returning to Duluth allowed him to take advantage of the Northland's opportunities.

As a project manager, he has successfully completed numerous projects varying in funding from \$8,000 to \$12.1 million dollars. His familiarity with the preparation of rezoning submittals, conditional use permits, variances and site plan review documents as well as his design, project management and public presentation skills enable him to represent a project from its design inception through permitting and construction.

His experience includes a strong background in commercial development projects, park planning, park design, trail masterplanning, urban design, residential design, construction documentation, construction observation, graphics and public presentations. He also has extensive skills using AutoCAD, Photoshop and additional software.

Throughout Luke's career, he has worked with and oversaw the work of civil engineers, architects, surveyors and technical personnel. His familiarity and experience in preparing planning, stormwater management and environmental documents further add to the depth of service Luke can offer a client.

Prior to working with Winston Associates, Luke worked for three years with RLK Associates (now RLK Incorporated) in Minnetonka, Minnesota.

He adds diversity to each project from studies in Australia, extensive travels throughout Europe, South America and the United States.
