ERIC R. JOHNSON

Registered Landscape Architect

Eric has 20+ years experience as a Landscape Architect in both the private and public sectors throughout Minnesota and the southeastern United States. His project management and design experience includes park, trail and streetscape design, residential community master planning, commercial and industrial developments as well as single family residential design services.

With a background in landscape architecture and planning, Eric provides clients with a valuable asset when processing a project through governmental agencies. His familiarity with the preparation of rezoning submittals, conditional use permits, variances and site plan review documents as well as his design, project management and public presentation skills enable him to represent a project from its design inception through permitting and construction.

Throughout Eric's career, he has worked with and oversaw the work of civil engineers, architects, surveyors and technical personnel. His familiarity and experience preparing environmental documents such as Environmental Assessment Worksheets (EAW) and Alternative Urban Area Review (AUAR) documents further add to the depth of service Eric can offer a client.

Prior to joining SAS+Associates, Eric worked with RLK Incorporated in Minnetonka, Minnesota; Paulson Mitchell Associates in Roswell, Georgia; the City of Blaine, Minnesota and Damon Farber Associates in Minneapolis, Minnesota.
